PREFACE

This report is one of a series of reports designed to provide continuous detailed information on selected airfields in the Soviet Union utilizing [] photography. The airfields selected are the Soviet Long Range, Naval, and Flight Testing airfields.

Each installation is examined for physical changes to the facilities and identification of the aircraft.

All changes in facilities are referenced to the most recent previous [] Mission.

LAST REPORT: None

DATE

:

This mission covers Kipelovo Airfield (Figure 1) with fair quality, stereo photography. Scattered clouds and haze preclude identification of the BEAR aircraft by model. The AOB is 10 BEAR (annotation 1, Figure 1) and 1 CAB (annotation 2, Figure 1). The only change to the airfield and its support facilities is some grading which indicates that a probable taxiway, connecting the parking apron with the north end of the runway, is under construction (annotation 3, Figure 1).
